

Anti-dumping measures imposed on China by LMICs, 2000-2025

New measures taking effect each year where the imposing country is low- or middle-income and the exporting country is China. Customs-union restatements counted once; China excluded as a reporter.

The two series differ only in whether EAEU measures count as LMIC action: 20 measures over 26 years, never more than 5 in a year.
