

PETER G. PETERSON INSTITUTE FOR INTERNATIONAL ECONOMICS

1750 Massachusetts Avenue, NW
Washington, DC 20036

TRANSPARENCY AND DISCLOSURE

To

The Peter G. Peterson Institute for International Economics (hereafter PIIE) is pleased to undertake the publication of your In order to maintain the highest standards in our economic research, PIIE has adopted a rigorous set of guidelines for conflicts of interest, data transparency, and quality control for all published research.

Accordingly, we ask you to agree with your signature to the following principles:

- 1) The source of all research funding must be acknowledged in each book, Policy Brief, Working Paper, PIIE Briefing, report, or other such publication. Such disclosure is encouraged but not required for every blog post or social media communication.
- 2) Authors must disclose in publications listed above all relevant material financial relationships that bear on their research, including relationship of employment, consulting, or ownership with firms that might be affected. A relationship is material if it exceeds \$10,000 in any year going back three years.
- 3) Authors must disclose in publications listed above potential conflicts of interest arising from leadership positions or board memberships in advocacy groups.
- 4) Authors must avoid giving another party the right to edit any part of the publication prior to release, or disclose any such editing if it takes place.
- 5) Financial relationships of spouses and partners are subject to disclosure to the PIIE leadership.
- 6) For op-eds and other commentary or research published outside PIIE, disclosure of research funding, material financial relationships, and other potential conflicts of interest should be made to those disseminating or sponsoring the material and can be made public at their discretion. For testimony, public disclosure should be the norm.
- 7) PIIE staff are free to use their Institute affiliation as identification on an outside project, but they must make clear in any written form or public speaking role that it is solely their own work and that it is neither a PIIE project nor has been subject to PIIE review.
- 8) Published research must supply tools necessary to outside verification of empirical results, including backup files and data, data assumptions, and modeling specifications. If any data cannot be disclosed publicly because they are confidential or proprietary or if publication of the data (on illegal activities, for example) could cause harm, please list:

If any problems arise in complying with these standards, you may make a written appeal to PIIE's executive vice president and director of studies.
